SUMMARY

Full Stack Developer with 5+ years architecting and shipping production systems for regulated industries — including NHS England telemedicine platforms used by hospitals across the country. I own the technical surface end-to-end: stack selection, component architecture, design systems, API contracts, and migration strategy. Track record across healthcare, fintech, and logistics in Next.js / React, Nodejs, TypeScript, AWS, and GraphQL. I lead teams, write the ADRs, and ship the cutover.

CORE EXPERTISE

Architecture	Full-Stack System Design, ADRs, API Contract Design, Migration Strategy, Scalability Patterns
Backend & Cloud	Node.js, Express, GraphQL, REST APIs, AWS (Lambda, S3, EC2, Chime SDK), GCP, Docker, CI/CD
Frontend	React, Next.js, TypeScript, JavaScript, Vue.js, Redux, React Query, GraphQL Clients, Storybook, Chromatic, MUI / Bootstrap, TailwindCSS, Styled Components
Design Systems	WCAG 2.1 (Accessibility), Design Tokens, Component Libraries, npm Publishing, Visual Regression Testing
Databases	MongoDB, DocumentDB, MySQL, DynamoDB
Performance	SSR / SSG / ISR, Core Web Vitals, Code Splitting, Bundle Optimization, Caching Strategy, Lighthouse
Testing	Jest, React Testing Library, Visual Regression (Chromatic)
AI-Augmented Dev	Cursor, Claude, GitHub Copilot — architecture exploration, test generation, documentation, refactoring

PROFESSIONAL EXPERIENCE

Senior Full Stack Engineer • InnoSTARK Technologies • Lahore, Pakistan

Jan 2023 – Present

- **Own** end-to-end delivery for NHS-affiliated telemedicine and patient-portal systems — backend services, GraphQL schemas, frontend platform, and CI/CD across 3+ production portals serving NHS England hospitals.
- **Designed** and deployed the Node.js / Lambda API layer and GraphQL schema for the live video-consultation platform after the infrastructure decision to replace Jitsi with AWS Chime SDK; executed cutover with no patient-facing downtime.
- **Architected** and published a WCAG 2.1 (AA)-compliant React / TypeScript component library to npm with Chromatic visual regression — adopted as the shared frontend foundation across portals.
- **Defined** and led a phased Vue-to-React migration spanning frontend boundaries and backend integration contracts; wrote the ADRs and established the PR-review and code-ownership culture that reduced regression incidents.
- **Established** the team's AI-augmented development standards (Claude + Copilot) — review guardrails, prompt templates for test specs and ADRs, and acceptance criteria for AI-generated code.
- **Mentor** 5+ engineers across full-stack workflows — API design, accessibility, and pragmatic AI usage; run internal design and code reviews.

Full Stack Engineer / Tech Lead • Techbucks • Lahore, Pakistan

Feb 2022 – Dec 2022

- **Led** a team of 3 engineers across concurrent client projects — owned technical direction across the stack (API, data model, frontend), sprint planning, and review culture; delivered all releases on schedule with zero critical post-release issues.
- **Built** and operated Node.js / Express + MongoDB API layers as the lead on projects — schema design, endpoint contracts, and deployment.
- **Designed** a reusable React component library that eliminated duplicated UI effort and standardized the team's frontend patterns.
- **Managed** GCP deployments and ran internal engineering workshops on React architecture, state management, and data modeling.

Full Stack Engineer • Ursol • Lahore, Pakistan

Dec 2020 – Dec 2021

- **Led** end-to-end delivery for an AI-powered application — integrated Node.js APIs with React UIs from requirements through stakeholder demo, delivering an accessible, cross-browser product.
- **Established** the team's frontend conventions, accessibility baseline, and API integration patterns — adopted as engineering standards.

KEY PROJECTS

AttendAnywhere — NHS England Telemedicine Platform · england.nhs.attendanywhere.com/

Next.js · TypeScript · AWS Chime SDK · Node.js · GraphQL · Lambda · Storybook · Bootstrap

- Owned the full frontend architecture for a government-backed NHS telemedicine platform. Drove the vendor evaluation that replaced Jitsi with AWS Chime SDK based on reliability, compliance, and latency. Worked on the GraphQL schema and Lambda API layer; led the WCAG 2.1 (AA) design-system rollout across portals; executed migration with no patient-facing downtime.

Zesty — Multi-Award-Winning NHS Patient Portal · <https://patients.mkuh.nhs.uk/>

React · TypeScript · Storybook · Chromatic · Vue.js · Ruby on Rails · Bootstrap

- Architected the WCAG-compliant design system spanning multiple UK NHS hospital portals, with Chromatic-driven visual regression and integrations. Defined the Vue-to-React migration strategy — component boundaries, data flow, and release phasing — improving long-term maintainability.

Skainet — AI Document & Workflow Platform · skainet.ai/

Next.js · Node.js · WebSockets · MongoDB · Redux · Python NLP · MUI

- 0→1 architecture ownership. Designed the Next.js SSR app, real-time document sync over WebSockets, MongoDB document model, and integration contract with the Python NLP pipeline. Led the team from blank repo to production.

RAAS — Crowdfunding & P2P Lending Platform

Next.js · Node.js · Express · Redux · Storybook · Tailwind

- Defined the frontend architecture for a regulated fintech product from scratch. Built a Storybook-driven component library and integrated third-party financial services to power end-to-end loan origination.

Suntrix — Solar Energy Platform · suntrix.com.pk/

Next.js · GraphQL · React Query · MUI · Directus · SSR

- Defined the full stack and built the application from zero. Used Next.js SSR and a GraphQL data layer to achieve strong Core Web Vitals and first-page SEO from launch.

GLT Dashboard — Logistics ERP · gltmena.com/

Next.js · React · Node.js · Express · Redux · Styled-Components

- Re-architected a complex multi-module ERP — redesigned state management, refactored API integration patterns, and led the frontend team through full delivery.

Asset Planet — Asset Management Platform · assetplanet.com/

React · Redux · Node.js · Express · Ant Design

- Refactored the live-platform UI architecture and introduced a centralized API layer, delivering measurable load-time improvements and reducing maintenance overhead.

EDUCATION

B.Sc. Software Engineering · COMSATS University Islamabad, Lahore Campus

2017 – 2021
